

AAA Express

Authentication Authorization and Accounting Software

EION AAA Express provides a cost effective solution for fixed, nomadic & mobile WiMAX subscribers in an enterprise network.

PRODUCT FEATURES

- AAA Express provides R3 support for EAP TTLS and TLS for authentication
- Multiple service flows per subscriber
- Multiple classifiers per service flow
- Support IP address, Port, Protocol and DSCP classifiers
- Support for UGS, RTPS, NRTPS, ERTPS and BE schedulers
- Supports TLV for configuring VLAN pass-through and CPE private VLAN
- Administration via Web-GUI interface

OVERVIEW

EION's AAA Express software has been developed as a cost competitive alternative AAA solution that is aimed towards enterprise users and closed networks where user billing is not required.

EION's AAA Express allows the operators to centrally provision all subscribers - fixed, nomadic or mobile. EION AAA express supports simple mobility.

The EION AAA Express software can run alongside the ASN Express software on the same stock PC.
