

Pulse is a trusted source and supplier to next generation service providers.

Comprehensive Technology Solutions

Pulse works with dozens of partners to supply the leading solutions for VoIP, Wireless/Backhaul, SS7/ISDN, TDM-over-IP, SONET/SDH, Optical, Compression, and Unified Communications.

We act as a single-source supplier that can address all of our customers' IT needs. We work with all of the industry's named brands, and also seek out unique telecom and connectivity solutions that other suppliers do not carry. As a result, Pulse delivers comprehensive solutions that are tailored to meet our customers' needs, and provide a genuine return on investment.

Unparalleled Industry Expertise

Our nationwide team with global reach provides an array of services that address: *network design, network analysis, systems integration, product distribution, installation and maintenance contracts.*

We act as a trusted source and seamless extension of each customer's IT departments. Our consultative approach involves a unique and extensive needs assessment program. Our products and services are carefully selected to complement one another.

Dedicated Service

The Pulse value proposition is not solely based on addressing IT requirements, but also on understanding our customers' business objectives. We've built our reputation by creating lasting relationships with our customers.

Value and Return on Investment

Our ability to deliver advanced technical knowledge results in cost savings for our clients. Our solutions are designed and managed to not only reduce expenses, but to improve business processes, accelerate response time, improve services to end users, and give our clients a competitive edge, now and into the future.

Solutions for VoIP, Wireless, Wide Area Networks, and Data Communications

Voice over IP:

Hardware and Software for the implementation and migration to VoIP, including:

- IP-PBX
- Class 4/5 Softswitch
- Session Border Controller
- LCR Routing
- Calling Card
- Wholesale Termination
- Low to High Density Media Gateways
- GSM, CDMA, UMTS integration

Wireless/Backhaul:

Solutions in licensed and unlicensed Microwave, WiMAX, Millimeter Wave and Free Space Optics.

TDM over IP:

Transparent T1/E1, T3/E3 data and voice via pseudowire IP technologies.

SONET/SDH:

Hardware based solutions for converting, extending and terminating SONET and SDH applications.

Voice Signaling:

Extensive knowledge and expertise in voice signaling solutions for carriers and enterprise. Protocol conversion, transport and signaling termination packages custom tailored for seamless integration of disparate voice networks utilizing any mix of SS7, C7, ISDN, CAS, R1, R2 and other protocols.

Optical:

Optimizing transport and consolidation of carrier and enterprise services enabling delivery of last mile Ethernet, Voice, SONET, SDH, and PDH via tailored DWDM, CWDM and Multiplexing solutions.

Unified Communications:

Telephony Solutions allowing carriers and enterprise to deliver next generation Unified Communications(UC) in legacy environments and new deployments.

Compression:

Transparent compression of E1/T1, E3/T3, SONET and SDH voice trunks for back-haul or other transport over narrowband networks.

Successful Track Record:

Pulse has helped hundreds of CLECs, ISPs, WISPs, Rural Tier-3 Telcos and Utility Service Providers integrate TDM, VoIP and wireless solutions in a manner that substantially impacts their bottom line.
