

Solutions for VoIP, Wireless, Wide Area Networks and Datacomm

Pulse Supply is a worldwide Value Added Distributor of Data Communications, Wide Area Networking and Voice over IP products and solutions. We provide innovative solutions and comprehensive know-how to assist companies and organizations in advancing their technological goals.

Pulse Supply is a leader in solutions for IP, VoIP, Wireless, SONET, SIP, Signaling and Interface Conversion, Voice Compression and last mile extension. We utilize these technology standards with time proven methodologies to enhance our customers' competitive capability.

Pulse Supply was formed to provide a source for superior Data Communications and Telecommunication products along with consulting services at competitive prices. We use a consultative approach, developing a needs assessment through dialogue with our clients. We are committed to designing and delivering solutions today that meet or exceed our customers' requirements, and carry them forward into the next generation of products.

Pulse Supply provides a multitude of services which includes consulting, network design, network analysis, systems integration, installation, maintenance contracts and product distribution. Our product solutions are utilized on fiber, copper, and wireless networks around the globe.

The right solution can provide quick, secure access to information from anywhere within an organization to anywhere in the world. These solutions are designed, built and managed to reduce expense, improve business processes, accelerate response time, and improve services to the end user, and give our clients a competitive edge, now and into the future.

Our range of services and products are carefully selected to complement each other to meet our clients' business needs. Whether designing a new business solution or reconfiguring an existing one, our goal is to utilize existing infrastructure when possible to control costs. We consistently find ways to reduce OPEX and CAPEX for our clients.

Pulse Supply has created partnerships with leading manufacturers to enhance its solutions. By leveraging these relationships, we can design cost effective solutions while providing a genuine return on investment. In addition, we provide a single source for all your networking requirements, hardware, software, support and services.

At Pulse Supply, we look forward to building business relationships and personal service with our customers. Contact your local Pulse Supply office or representative today and let us be a valuable extension of your organization or enterprise.

NSGDatacom Inc.

Solutions for VoIP, Wireless, Wide Area Networks and Datacomm

Data Communications

Wide Area Networking

Traditional solutions including TDM and Packet based equipment and last mile termination.

Ethernet and IP Extension

Solutions to extend Ethernet and IP over copper, fiber and wireless technologies .

Interface Conversion

Solutions for converting legacy and modern interfaces

IP Optimization

Packet based traffic management

Signaling Conversion

Packet based traffic management

SONET/SDH Solutions

Hardware based solutions for converting, extending, and terminating SONET and SDH applications

Test and Access

Solutions for circuit testing and non-intrusive access

TDM over IP

Transparent T1/E1, T3/E3 data and voice over IP via pseudowire technologies

Voice over IP

Hardware and software for the implementation and migration to VoIP, addressing Service Providers, Carriers, and Enterprise

- ◆ PBX
- ◆ Class 5 Switch
- ◆ LCR Routing
- ◆ Wholesale Termination
- ◆ Low to High Density Media Gateways
- ◆ GSM, CDMA, UMTS integration
- ◆ Class 4 Softswitch
- ◆ SBC
- ◆ Calling Card
- ◆ Conversion

Voice Compression

Solutions to compress digital E1/T1 and Analog voice circuits

Wireless

Solutions in licensed and unlicensed Microwave, WiMAX, Millimeter Wave and Free Space Optics
