

FTP-1534 Series for 100GBASE-SR4 Links

Completely passive fault tolerant design.
Link access, anytime.

Ideal for permanent, 24x7 access to your fiber network
for Network Analysis, IDS and monitoring applications

100 Gigabit fiber taps from Datacom Systems provide your network monitoring and security tools passive permanent access into your 100GBASE-SR4 fiber network.

These network taps are ideal for security applications, network monitoring and anywhere you need to see all the data that only an In-Line solution can provide. Invisible to the network, completely passive and fault-tolerant, fiber taps will not affect network performance or integrity.

They provide permanent In-Line access to network links - eliminating the need for network connectors to be disconnected and connected each time a segment needs to be analyzed.

Our taps allow you to view layer 1 and 2 errors not seen when performing network monitoring using SPAN ports.

No Y or breakout cable required
Optional 1U rack mount holds 3 taps
4U 12 bay rack available
