Solutions for Utility Service/Work Trucks & Cargo Delivery Service Vans

Fleet Modernization Is Moving Full Speed Ahead

Organizations of all types are seeing growing demands for productivity, accurate real-time responsiveness and last-mile service capability and connectivity. Service vehicles, including utility service/work trucks and cargo delivery service vans are increasingly important to achieving strategic and tactical business objectives. Upfitted with an expanding range of connected technologies, service vehicles are now able to be better equipped to meet or exceed customer requirements.

In these times, all organizations are especially concerned with safety. High-touch surfaces can harbor harmful bacteria and viruses. To address this concern, Tripp Lite offers an assortment of Safe-IT™ antimicrobial and antibacterial products, including antibacterial cables and antimicrobial surge protectors, power strips and charging carts. Designed to minimize the presence of harmful germs, Safe-IT products have obvious utility in healthcare applications, but they also provide everyday protection and peace of mind to all users and installers of frequently handled equipment. They not only help reduce the chance of serious illness, they can also help reduce employee absences and increase job satisfaction.

What's the Difference Between Antibacterial and Antimicrobial?

Antibacterial protection inhibits the growth of harmful bacteria like E. coli and Staph. Antimicrobial protection also inhibits bacterial growth, but adds protection against viruses, mold and fungi. Protection varies by product, so it's important to refer to the manufacturer's specifications for more information. Tripp Lite Safe-IT products are backed by test data that details protection against specific pathogens.

Application Examples

Businesses in a variety of sectors, as well as municipalities and government agencies, expect the truck of the future to play an increasingly critical role in improving operational efficiency, reducing errors, increasing productivity, boosting customer satisfaction and enhancing health and safety.

Given how quickly technology evolves, it can be difficult to stay current with the best options, which makes expert guidance especially valuable. Tripp Lite offers comprehensive solutions, deep experience, custom product expertise and single-source capability, helping to achieve fleet modernization goals.
