

## ErisTerminal® SIP DECT Cordless 4-Line Deskset

### VDP658

The VDP658 DECT 6.0 Cordless 4-Line Deskset is ideal for those places you want the look of a deskset, but the convenience of a handset. No Ethernet drop required. Plug this deskset into a nearby power outlet, and you're ready to easily manage call routing. When paired with the VDP650 SIP DECT 4-Line Base Station, each deskset can have its own extension and unique phone number. With four programmable LED backlit line keys right on the cordless deskset, easily handle multiple calls. With key system emulation, the VDP650 Series handles shared line appearances locally without the need for SCA (shared call appearances) support from your provider. You can even hold a call and resume it on a different deskset or handset with a single press of a button. No complicated programming required.

### VDP658 Key Features

#### Key system emulation

Easily handle calls with shared line appearances/shared call appearance (SCA<sup>1</sup>) across all cordless phones without the need for SCA support from your provider. The VDP650 base station handles the SCA lines locally, so you can answer, hold and resume calls on any phone at the touch of a button. You still gain the benefits of advanced SIP features like voicemail, auto attendants and DID routing from your provider.

#### Easy wireless installation

Set up your phone system in minutes. Cordless handsets and desksets can be easily paired with the press of a button. There's no complicated wiring or cabling requirements. You only need one ethernet connection and simple provision on the DECT base for easy deployment.

#### Programmable line keys

Program backlit line keys right on the cordless phone to give you one button hold and resume from any cordless handset or deskset. You can also program a line key for a private extension or other function.

#### Clear mobility with DECT 6.0 digital technology

Leave your desk without leaving your work behind. Enjoy DECT 6.0 sound quality and reception, which provides strong protection against wiretapping. DECT also ensures the best call range while not interfering with wireless routers.

#### Scalability

Growing pains? Register up to 10 cordless handsets or desksets to the VDP650 DECT cordless base station and program each one with its own phone number or extension.

#### HD voice quality

With G.722 wideband codec support for HD audio, calls have never sounded so rich and life-like.

#### Flexible power

Need a phone in a remote location for a while? With 7 hours of talk time, you can move this phone where you need without wires.

#### Intuitive design

You're in business with a user-friendly interface, large backlit display, four programmable line keys, two soft keys and a navigational pad.

#### Three-year warranty

Enjoy the peace of mind that comes with an industry-leading, standard three-year warranty. VTech also provides advanced replacement on warranty claims using new, not refurbished, products.
